summary

Computer engineer focused on **web development**. Specialized in frontend with JavaScript and React with more than three years of experience.
In the two first companies where I have worked, I contributed to teamwork, willingness to learn and determination to provide solutions. Currently acting as a mid-senior frontend developer, decision-making and mentoring new team members.
Between the first two jobs, I took a year to improve my English. I went to UK for a year and went back in 2020, to return to work as a software engineer, which is what I am currently working on and what I am passionate about.

skills

Main skills: **JavaScript** / **React** / **React Native**
 Others:
- JavaScript libraries:
  Redux (Redux-saga, Redux-thunk, Redux-reselect)
- New features:
  ES9 / **React-hooks**
- JavaScript Testing Framework:
  Jest / **Enzyme**
- Markup and style sheet language: html5 / css3
- Version control: **Git**
